

Live social gaming!
play & message together!

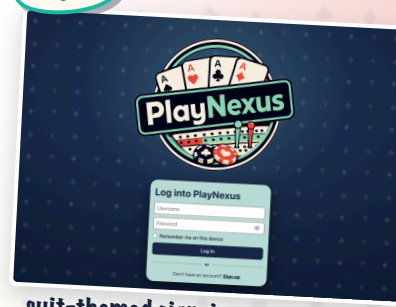

Pull up. Peg in. Play on.

Tired of being shoved into ranked queues with strangers? PlayNexus brings correspondence gaming back to its calmer roots: build a profile, friend who you actually play with, and enjoy classics like Cribbage at your own pace. No friend online? Take on our AI on Easy or Hard.

Brag & banter!

upgraded forum

Under the hood

React · TypeScript · Express · Socket.io · Supabase / Postgres
Render CI/CD · Playwright + axe-core

- Server-authoritative: every move is validated & keyed-locked server-side, then pushed over Socket.io rooms — no client cheating, no polling
- Auth sessions guarded by Postgres row-level security; end-to-end shared types, and a CI gate (lint · Playwright + axe-core) auto-deploys the monorepo to Render on each merge

What's next: Expert AI via Expectiminimax · invite a friend to spectate your live match · ranked ladders & tournaments · more classics (Chess, Euchre, Backgammon) · unlockable board & card themes · full mobile PWA with push notifications
